Ch 4: Supplement Stack for Indian Athletes

Supplement	Dose	Timing	Indian Brand	Monthly Cost
Creatine monohydrate	5g/day	Any time; consistency beats timing	AS-IT-IS, MuscleBlaze, Optimum	Rs 400–600
Whey protein	25–40g/day	Post-workout + between meals if needed	MuscleBlaze, MyProtein India, Optimum	Rs 1500–3000
Vitamin D3	2000–5000 IU	Morning with a fat-containing meal	Any generic brand; inexpensive	Rs 150–300
Omega-3 fish oil	2–3g EPA+DHA	With largest meal of the day	Himalaya, HealthKart, NOW Foods	Rs 400–700
Ashwagandha (KSM-66)	600mg	Evening or before bed	Himalaya, KSM-66 branded products	Rs 300–600
Zinc + Magnesium (ZMA)	Zinc 30mg + Mag 400mg	Before bed (empty stomach best)	MuscleBlaze ZMA, NOW Sports ZMA	Rs 300–500

Ch 5: Meal Timing & Pre/Post Workout

While total daily protein and calories are the primary drivers of body composition, meal timing around training can provide meaningful secondary benefits — particularly for advanced athletes training intensely.

Timing Window	Recommendation	Why It Matters	Indian Foods
Pre-workout (60–90 min before)	30–40g carbs + 20–30g protein	Muscle glycogen topped up; amino acids available during training	Banana + roti + curd OR oats + whey
Intra-workout (during, if > 75 min)	Electrolytes + 20–30g fast carbs	Maintains performance; prevents late-session glycogen crash	ORS sachets + banana OR sports drink
Post-workout (within 60 min)	30–50g protein + 50–80g carbs	Initiates muscle protein synthesis; replenishes glycogen	Whey + rice OR chicken + roti
Pre-sleep (30–60 min before bed)	30–40g slow protein	Sustains MPS throughout overnight fast	Casein shake OR 200g cottage cheese OR 1 cup curd
