

Pharmaceutical Performance Science (18+)

Module 14

Insulin & Growth Hormone — Educational Overview

Module Overview

This module is part of the **Pharmaceutical Performance Science (18+)** offered by Royal Fitness Club Academy. In this module, you will explore the key concepts and practical applications essential to your fitness education journey.

Topics Covered in This Module

1. Exogenous GH: mechanisms, dosing ranges, and side effects
2. IGF-1 axis: downstream effects of supraphysiological GH
3. Insulin in bodybuilding: risk of fatal hypoglycemia
4. Fast-acting vs slow-acting insulin analogs
5. Acromegaly risk from prolonged GH use
6. Why combining GH + insulin is the realm of professional bodybuilding

Learning Objectives

- ✓ Understand and articulate the core concepts presented in this module.
- ✓ Apply the knowledge gained to real-world fitness and coaching scenarios.
- ✓ Critically evaluate evidence and best practices in this topic area.
- ✓ Complete the module assessment with a minimum score of 70% to earn your RFC Certificate.

■ Important Note

This PDF is your study companion for Module 14. Use it alongside your online course co
