

Pharmaceutical Performance Science (18+)

Module 2

Anabolic Steroids — Mechanisms & Pharmacology

Module Overview

This module is part of the **Pharmaceutical Performance Science (18+)** offered by Royal Fitness Club Academy. In this module, you will explore the key concepts and practical applications essential to your fitness education journey.

Topics Covered in This Module

1. Androgen receptor (AR) binding and gene transcription
2. Anabolic vs androgenic activity ratios
3. Testosterone esters: propionate, enanthate, cypionate
4. Nandrolone (Deca), Trenbolone — pharmacology and risks
5. Oral 17-alpha alkylated steroids: hepatotoxicity mechanism
6. DHT derivatives: stanozolol, oxandrolone, masteron

Learning Objectives

- ✓ Understand and articulate the core concepts presented in this module.
- ✓ Apply the knowledge gained to real-world fitness and coaching scenarios.
- ✓ Critically evaluate evidence and best practices in this topic area.
- ✓ Complete the module assessment with a minimum score of 70% to earn your RFC Certificate.
