CHAPTER 1 — INDIAN FOOD SCIENCE FOR BODYBUILDING

"India has the world's richest vegetarian food culture. It also has one of the most protein-deficient average diets. These two facts are not contradictory — they are an opportunity."

The traditional Indian diet is primarily carbohydrate-dominant — rice, roti, daal, sabzi — with protein often playing a secondary role. For bodybuilders, this nutritional architecture needs strategic restructuring. The good news: Indian cuisine offers world-class protein sources (paneer, daal, eggs, chicken, fish) and an extraordinary array of anti-inflammatory spices (turmeric, ginger, black pepper, cumin) that support recovery and hormonal health.

Indian Food	Protein (100g)	Carbs (100g)	Fat (100g)	Bodybuilding Rating
Paneer	18g	1g	20g	★★★★★ (protein + fat)
Chicken breast	31g	0g	3g	★★★★★ (lean protein king)
Whole eggs	13g	1g	10g	★★★★★ (complete protein)
Moong dal (cooked)	7g	19g	0.4g	★★★★ (high-volume protein)
Rajma (cooked)	9g	22g	0.5g	★★★★ (excellent bulking food)
Greek yoghurt	10g	3g	5g	★★★★ (probiotic + protein)
Roti (1 piece)	3g	15g	0.5g	★★★ (complex carb base)
Brown rice (cooked)	2.5g	23g	0.2g	★★★ (quality carb source)

CHAPTER 2 — PROTEIN SOURCES COMPLETE GUIDE

Source	Serving	Protein	Cost Rating	Best Used In
Chicken breast (cooked)	150g	47g	Low	Lunch/dinner — versatile
Whole eggs	3 eggs	18g	Very Low	Breakfast, pre-bed
Paneer	100g	18g	Moderate	Sabzi, bhurji, tikka
Whey protein	1 scoop (30g)	24g	Moderate	Post-workout, between meals
Greek yoghurt	200g	20g	Moderate	Snack, raita base
Tuna (canned)	1 can (100g)	25g	Very Low	Quick meal, salads
Soya chunks (rehydrated)	50g dry	25g	Very Low	Curry base, ideal for vegetarians
Moong dal	100g cooked	7g	Very Low	Soup, chilla, dal
Roasted chana	50g	10g	Very Low	Snack, portable protein

■ **Indian bodybuilder protein priority order: chicken breast → eggs → paneer/soya chunks → whey protein → dal. Aim for at least 3 of these sources daily.**

CHAPTER 3 — BULKING MEAL PLANS

3500–4000 kcal Bulking Day (80kg athlete)

Meal	Foods	Protein	Kcal
7 AM Breakfast	6 eggs + 4 roti + 1 cup full-fat milk	45g	700
10 AM Mid-morning	200g paneer bhurji + 2 slices bread	38g	520
1 PM Pre-workout	2 cups rice + 200g chicken curry + salad	42g	680
3 PM Pre-workout shake	1.5 scoops whey + 1 banana + 30g oats	42g	480
6 PM Post-workout	2 scoops whey + 50g dextrose	50g	400
8 PM Dinner	200g fish + 3 roti + 1 cup daal + sabzi	55g	720
10 PM Night	300ml milk + 30g casein protein	40g	360

Total: ~3860 kcal, ~312g protein

CHAPTER 4 — CUTTING MEAL PLANS

1800–2000 kcal Cutting Day (80kg athlete)

Meal	Foods	Protein	Kcal
7 AM Breakfast	4 egg whites + 2 whole eggs + spinach omelette	30g	280
10 AM Mid-morning	200g Greek yoghurt + 10 almonds	22g	240
1 PM Lunch	150g grilled chicken + 1 cup brown rice + salad	38g	440
4 PM Pre-workout	1 scoop whey + 1 apple	24g	230
7 PM Dinner	200g paneer tikka + 2 roti + raita (small)	44g	580
9 PM Night	1 scoop casein + water	24g	130

Total: ~1900 kcal, ~182g protein. Adjust roti/rice portions to hit exact calorie target.

CHAPTER 5 — SUPPLEMENT STRATEGY

"Supplements supplement a good diet. They do not replace one. Get the food right first — then fill the specific gaps with supplements."

Supplement	Priority	Dose	Indian-Specific Note
Whey Protein (isolate)	Essential	1–2 scoops/day	Dymatize, Optimum Nutrition reliable in India
Creatine Monohydrate	Essential	5g/day	Unflavoured — add to shake or water
Vitamin D3	Essential	2000–5000 IU	Most Indians significantly deficient
Omega-3	High	2–3g EPA/DHA	International Fish Oil — avoid cheap Indian brands
Zinc + Magnesium	High	25mg Zn + 300mg Mg	ZMA tablets widely available
Ashwagandha KSM-66	Moderate	600mg/day	Himalaya or KSM-66 standardised extract
Multivitamin	Moderate	As directed	Fills micronutrient gaps in Indian diet
Pre-workout	Optional	As directed	Caffeine + beta-alanine most evidenced

- Spend on food before supplements — 500g chicken costs less than one bottle of most supplements
- Indian brands: MuscleBlaze and AS-IT-IS are reliable for whey protein
- Avoid testosterone boosters — the evidence is weak and the claims are exaggerated
- Protein bars: read labels — most Indian protein bars have less protein than advertised
