

Pharmaceutical Performance Science (18+)

Module 3

SARMs — Selective Androgen Receptor Modulators

Module Overview

This module is part of the **Pharmaceutical Performance Science (18+)** offered by Royal Fitness Club Academy. In this module, you will explore the key concepts and practical applications essential to your fitness education journey.

Topics Covered in This Module

1. SARM mechanism: tissue-selective AR modulation
2. Ostarine (MK-2866): clinical trials and dosing data
3. Ligandrol (LGD-4033): muscle gain data and suppression
4. RAD-140 (Testolone): potency and CNS effects
5. Cardarine (GW-501516): PPAR agonist — not a SARM, cancer risk
6. S23 and YK-11: strongest SARMs and myostatin inhibition

Learning Objectives

- ✓ Understand and articulate the core concepts presented in this module.
- ✓ Apply the knowledge gained to real-world fitness and coaching scenarios.
- ✓ Critically evaluate evidence and best practices in this topic area.
- ✓ Complete the module assessment with a minimum score of 70% to earn your RFC Certificate.

■ Important Note

This PDF is your study companion for Module 3. Use it alongside your online course con
