

Pharmaceutical Performance Science (18+)

Module 9

Blood Work Interpretation for Performance Users

Module Overview

This module is part of the **Pharmaceutical Performance Science (18+)** offered by Royal Fitness Club Academy. In this module, you will explore the key concepts and practical applications essential to your fitness education journey.

Topics Covered in This Module

1. Pre-cycle baseline: what panels to run and why
2. On-cycle monitoring: liver enzymes, hematocrit, lipids
3. Lipid impact: HDL suppression and LDL elevation
4. Free vs total testosterone: interpretation on and off cycle
5. SHBG and its role in bioavailable testosterone
6. Post-PCT panels: what recovery looks like

Learning Objectives

- ✓ Understand and articulate the core concepts presented in this module.
- ✓ Apply the knowledge gained to real-world fitness and coaching scenarios.
- ✓ Critically evaluate evidence and best practices in this topic area.
- ✓ Complete the module assessment with a minimum score of 70% to earn your RFC Certificate.
